## ABOUT ME

**Frontend Developer** with 2.5 years of experience in building modern single-page applications (SPAs). Specialized in developing scalable and responsive web applications using the JavaScript stack: **React**, **Next**, **Vue**, as well as state management with **Redux Toolkit**, **Vuex**, and **Pinia**. Proficient in **TypeScript**, **JavaScript ES6+**, **HTML5**, **CSS3**, and **SCSS**. Passionate about creating adaptive and user-friendly interfaces, as well as optimizing application performance.

## EXPERIENCES

### Frontend-developer

Nov 2024 - Present

СЮК Экономика Имущество Инвестиции, Minsk, Belarus

#### Business Card Website Builder for Lawyers (full development cycle)

- Developed an automated business card website generation system based on data added via an admin panel, built with **Next.js**, **Redux Toolkit**, and **RTK Query**.
- Improved search engine visibility and boosted loading speed by implementing **Next.js**.
- Cut project costs by **40%** and accelerated development by **30%** by using **Supabase** for the backend.
- Created a **responsive design** that displays correctly on all devices and added **light/dark themes** for better user experience.
- Reduced development time by **25%** by leveraging **Radix UI** pre-built components.
- Optimized page load performance through **lazy loading** and next-gen image formats (**WebP**, **AVIF**), reducing image weight by **30-50%**.

### Frontend-developer

Oct 2022 - Nov 2024

IDS Logic, India

#### Business Card Design & Ordering Application

- Developed an **interactive React-based interface** for creating and uploading business card templates, enabling clients to independently customize designs by selecting elements (text, images, logos) and adjusting layouts. This streamlined the ordering process and **reduced design approval time**.
- Implemented **TypeScript**, reducing development-stage errors by **40%** and enhancing application reliability.
- Built **end-to-end authentication and authorization**, including:
  - Secure **JWT-based registration/login** forms.
  - **Social media auth** (Google, Yandex, Telegram) for seamless user onboarding.
  - **Password recovery** via email.
  - **Role-based UI** (admin/user) for granular access control.
- Collaborated closely with backend developers to ensure smooth frontend-server integration.

#### Reusable Component Library

- Created a **component library** using **shadcn/ui**, accelerating feature development by **30%**.
- Integrated **Storybook** to document components and demonstrate their behavior across scenarios.

Internal CRM, Admin Panel & Client Projects

- Developed **Vue.js + Pinia** modules, including:
- A **real-time messenger** for employee communication.
- **User dashboards** with settings, feedback forms, and surveys.
- Designed **data capture forms** with **Zod validation** and error handling, improving data accuracy by **25%**.
- Refactored components using **Separation of Concerns (SoC)**, enhancing code readability and maintainability.
- Automated workflows via **custom bots**, increasing user engagement by **20%** and reducing manual labor by **15%**.
- Implemented **WebSocket** for bidirectional client-server communication, boosting data exchange speed and UX.
- Created **custom hooks** for API/error handling, **eliminating 100% of code duplication** and decoupling data logic from components.
