DESIRED POSITION

Frontend-developer

Specialization:
  - Programmer, Developer
Employment Type: Full-time, Part-time, Contract
Work Arrangement: Office, Remote, Hybrid
Commute Time: Not applicable

ABOUT ME

Frontend developer with over 2 years of experience building SPAs using **React, Next.js, Redux (Toolkit), TypeScript, JavaScript ES6+,** and a strong understanding of UI design, testing, and debugging.

I'm constantly expanding my skillset by exploring new technologies (including React Native).

EXPERIENCES

Frontend-developer   2022 - present

Key responsibilities

- Developing new features with business logic based on technical specifications and designing layouts according to Figma mockups.
- Building a UI Kit library that speeds up development by 20%.
- Documentation of the developed functionality.
- Code refactoring and optimization.
- Project architectural solutions (layering UI, BLL, DAL, Server).
- RESTful (registration / loginization / pagination).
- Performance enhancement (memo, useCallback, lazy loading, etc).
- Covering applications with tests and Storybook.
- Bug fixing, deploying, team development.

EDUCATION

Programmer, Developer
